Hi! We are FELSi! “Sustainability” is our core principle in everything we create!

In recent years, there has been an increasing awareness of the critical need to minimise plastic usage to mitigate environmental damage caused by waste disposal. We recognise the significance of reducing waste in our daily lives and the essential need for more alternatives in the market. With over 20 years of experience in the printing and packaging industry, FELSi was founded in 2019 with the goal of bringing our vision to life. Armed with this clear vision and a team of dedicated professionals, we embarked on a journey to make a positive impact. Over the years, we have broadened our offerings and adopted innovative technologies while remaining true to our core principles. Fueled by our passion for innovation and a commitment to excellence, we are confident that FELSi will evolve from a small startup into a prominent player in the industry, creating high-quality products and services to fulfil our mission.

Our Value

Quality

Committed to maintaining the best quality of products and services

Sustainability

Dedicated to sustainable practices that positively impact our environment

Integrity

Conducting business with honesty to build a long-term partnership with our clients

Innovation

Explore new ideas and technology to provide innovative solutions that best fit our clients

Our Operation

FELSi operates business segments across Asia and Australia to enhance our service reach. Our goal is to offer our green packaging solutions to all Asian nations, inviting our clients to collaborate with us in minimising waste in our operations. Whenever feasible, we will source materials locally to reduce the carbon footprint associated with our processes.

Additionally, we have established an international supply chain for materials and delivery, which helps us strike a balance between sustainable operations and delivering high-quality products and services to our global clients.

Product Life Cycle

It is essential to ensure that our operations and products are both sustainable and beneficial to minimize daily waste. Therefore, our goal is to establish a life cycle that reduces environmental impact throughout our sourcing, production, and the disposal of our products by customers. We guarantee that our products are sourced from responsible suppliers, and our production process is strictly controlled according to various standards to minimize emissions. Once customers have used the product, they can dispose of it with food waste, allowing it to be composted when handled correctly. With this approach, we can significantly reduce emissions and promote sustainability in our daily lives!

Our Services

FELSi is dedicated to delivering exceptional service to meet our customers' needs! Allow us to assist your business in addressing the growing demand for sustainable products!

Packaging Solution

We offer a variety of packaging solutions suitable for industries beyond just Food & Beverages. We are always eager to create the perfect solution tailored to your needs!

Customisable Service

Our customizable products offer various options to enhance your brand image, including shape, printing effect, and materials that best represent your company.

Fast & On Time Fulfillment

Thanks to our business network, we ensure all orders are processed and prepared for shipment in the shortest time, ensuring your business never runs out of stock!

Comprehensive Support

Our team is dedicated to providing complete support to our clients, including logistics coordination, product co-design, after-sales services, and more.

Our Products

A Sturdy, Compostable Solution For All Purposes!

Our products are resilient against hot oil at 120°C and boiling water at 100°C without any signs of deformation or leakage, proving their effectiveness for all types of packaging.

Our products are designed to be refrigerator-friendly, capable of withstanding temperatures of 0 to 8°C without any leakage. They are perfect for keeping the freshness of foods or items stored in a cool environment.

Our products can be recycled or composted within 4 to 9 months. This process not only minimizes waste but also enriches the soil as compost, promoting the growth of vibrant plant life.

There is a lot more we can do for you!

We offer a range of packaging solutions for more than just the food and beverage industry. Allow us to assist you in replacing plastic packaging with our diverse options made from plant pulp!

SUITABLE FOR:

- Toys
- Retail Products
- Medical Supplies
- Premium Gift
- Luxury Products
- Home Supplies
- Fragile Goods

Contact us for more information!

Wine Packaging Solution

Kraft paper is great. But we have some better options available for your business.

We believe that good wine packaging should achieve two major purposes: protecting the product itself and effectively showcasing your brand identity or message to the recipient. Under these requirements, we believe our wine packaging solution will be an excellent alternative for your business!

A Sturdy, Variety of Shapes Option

Similar to plastic, bagasse can be moulded into various forms. It is also generally sturdier than paper or cardboard, providing enhanced protection for wine. Our bagasse wine holder can provide the best protection in different shapes to fit your needs.

It's customisable to best fit your needs!

We offer a comprehensive array of customisation options for you to choose from. Whether it's the box structure, printing design and effects, or any additional packages, we are dedicated to crafting the perfect solution tailored to your needs!

Low Environmental Impact

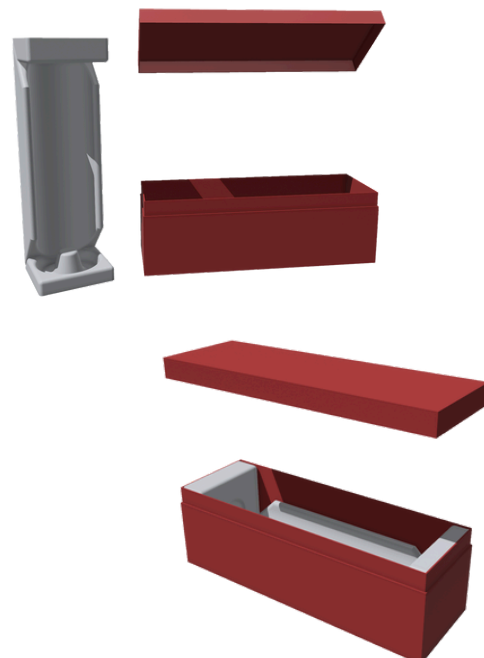

Sugarcane can be harvested within 12 to 18 months, whereas a typical tree often takes more than 7 years. And bagasse is a by-product of sugar production. It plays a pivotal role in effectively utilizing waste from the process and minimizing environmental damage with this shorter harvest cycle.

Stay Ahead of the Competition

You can enhance your brand reputation by adopting eco-friendly packaging and lead the market by pioneering this innovative packaging concept. Our wine packaging solution can also improve your company's packaging efficiency and cost-effectiveness.

1 Bottle Box Set

Perfect as a gift for your family and friends, or a special package for your wine. Select from our two styles of Bagasse wine holder trays and different designs of packing boxes or sleeves. High flexibility of options is available to find the best fit for your needs.

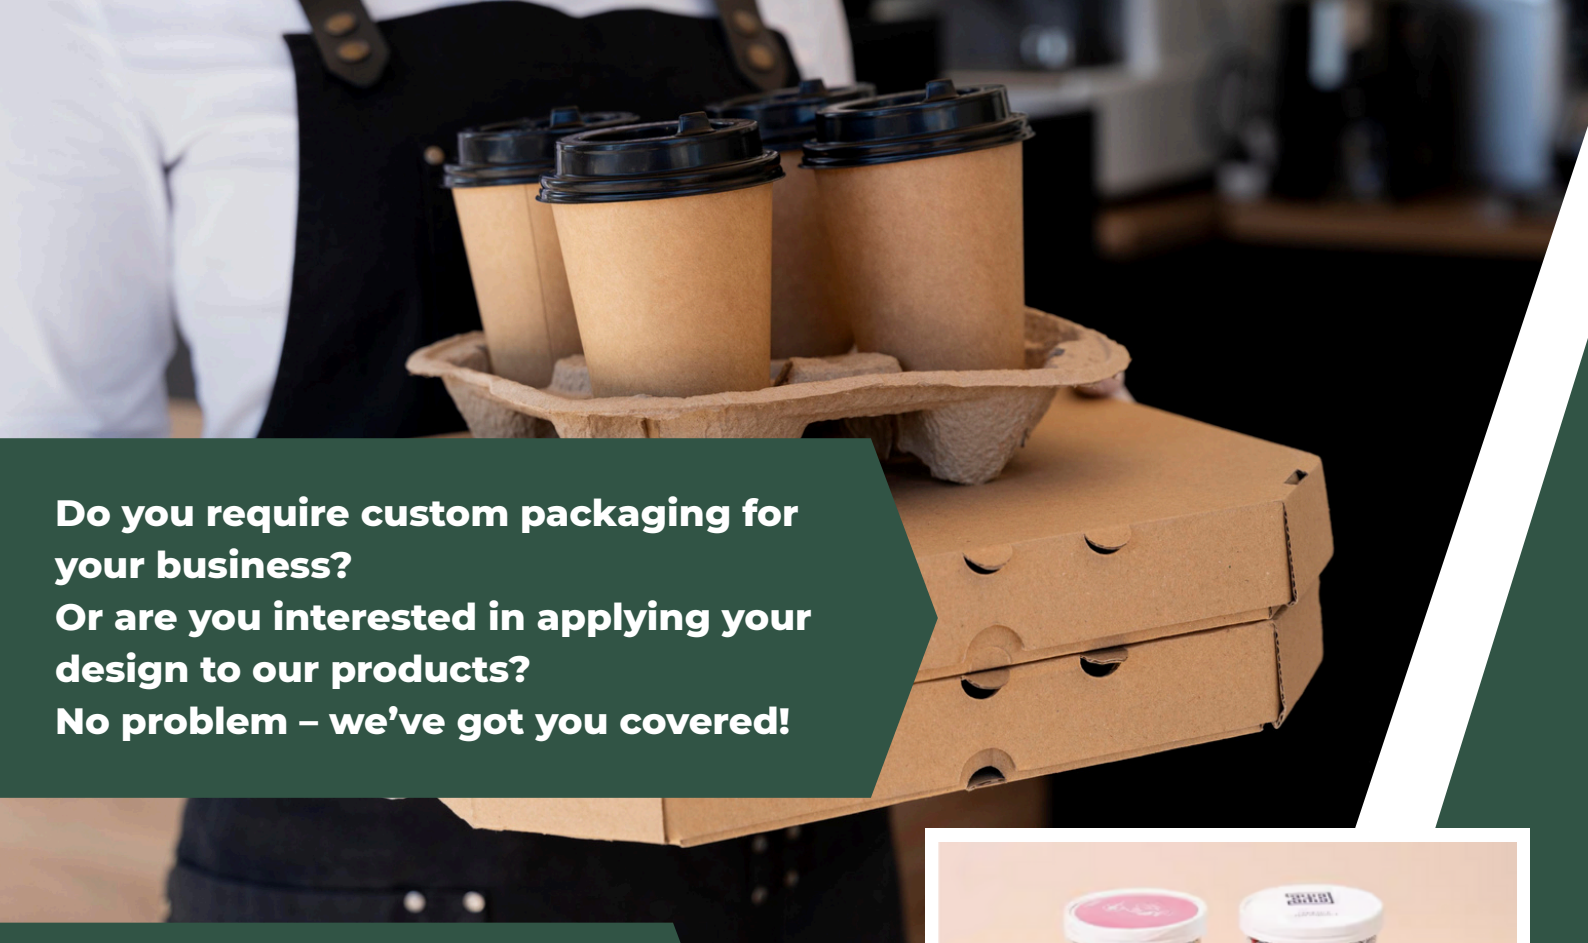

3 Bottle Box Set

Ideal for a wine gift set or perfect for sharing with family and friends! Select from our two styles of Bagasse wine holder trays and the packaging box that best suits your requirements. You can also customise the packaging box to reflect your brand identity.

6 Bottle Box Set

Great protection for the wine bundle set or a large delivery order from clients. Select from our two styles of Bagasse wine holder trays and the packing box that best suits your requirements. The packing box is customisable to reflect your brand identity.

Do you require custom packaging for your business?
Or are you interested in applying your design to our products?
No problem – we've got you covered!

It's easier to create your own custom packaging than you might think!

Whether you want to apply your brand design to our current products or create entirely new items tailored to your needs, our skilled team is here to assist you in customizing a product that perfectly suits your business!

- Free design service for Custom Print services
- Stock management assistance
- Fast production and fulfilment
- Safe & Simple payment process
- Food-safe & non-toxic ink used for printing

- Minimum order quantities apply to the custom printing service.
 - Tooling costs and minimum order quantities are applied for custom mould products.

OUR CUSTOMISATION PROCESS

Concept Design

We receive requests from clients and will have further discussions to confirm the details of their needs.

Prepare Sample

Our R&D Team will develop the 3D model or product sample according to the client's requirement.

Review & Modify

We will share the 3D model or sample for your review and approval, or further modify it based on your feedback.

Ready For Production

Once the sample was approved, the custom design will be ready to be used for mass production.
